

İnanç Haluk Aksoy

PHP Developer

I am a PHP Developer who thinks analytically, is attentive, ambitious, highly motivated, curious, open to self development and eager to learn. I got interested in software development well before high school, but I started to really improve myself during junior high school. The projects I did were mostly web projects on LAMP stacks. Developing projects on subjects I did not know always excited me. In such situations, Google was my best friend. I do not avoid researching the problems I encounter, asking questions that I cannot find a solution to, and learning new things. For these reasons, I can describe myself as a IX Engineer. I got my Management Information Systems undergraduate degree from Ankara Yıldırım Beyazıt University, and I am currently pursuing my master's degree in the same field at Marmara University.

WORK EXPERIENCE

Shopier • Istanbul, Turkey 05/2022 – Present Full Stack Developer

- Implemented Elasticsearch for the e-commerce platform, enhancing indexing, synchronization, and search capabilities for millions of daily records.
- Enhanced website performance and reliability by leading the migration of millions of picture files from AWS S3 to Cloudflare R2, resulting in improved user satisfaction and increased site uptime.
- Contributed to the development of internal tools, resulting in a direct and indirect increase in efficiency.
- Developed backend services, streamlining processes and enhancing efficiency across the platform.
- TechStack: Docker, PHP8, Python, HTML, JS, JQuery, MySQL, AWS, Elasticsearch

SNG Digital Information Technologies • 08/2021 – 05/2022 Istanbul, Turkey PHP Developer

- I took part in the development of services such as Taskhouse, Perakende Dijital and Bir Adım Sağlık at SNG Information Technologies, one of the Pozitera Group companies. I had the opportunity to take part in all areas of the software life cycle in these systems that we developed with the LAMP stack.
- TechStack: PHP7.4, HTML, JS, JQuery, MySQL, AWS
